2. IT Professor, Aiani High School – Kozani, Greece

3. Technical Manager at the "Center for Informatics and New Technologies", Department of Secondary Education of Kozani, Greece

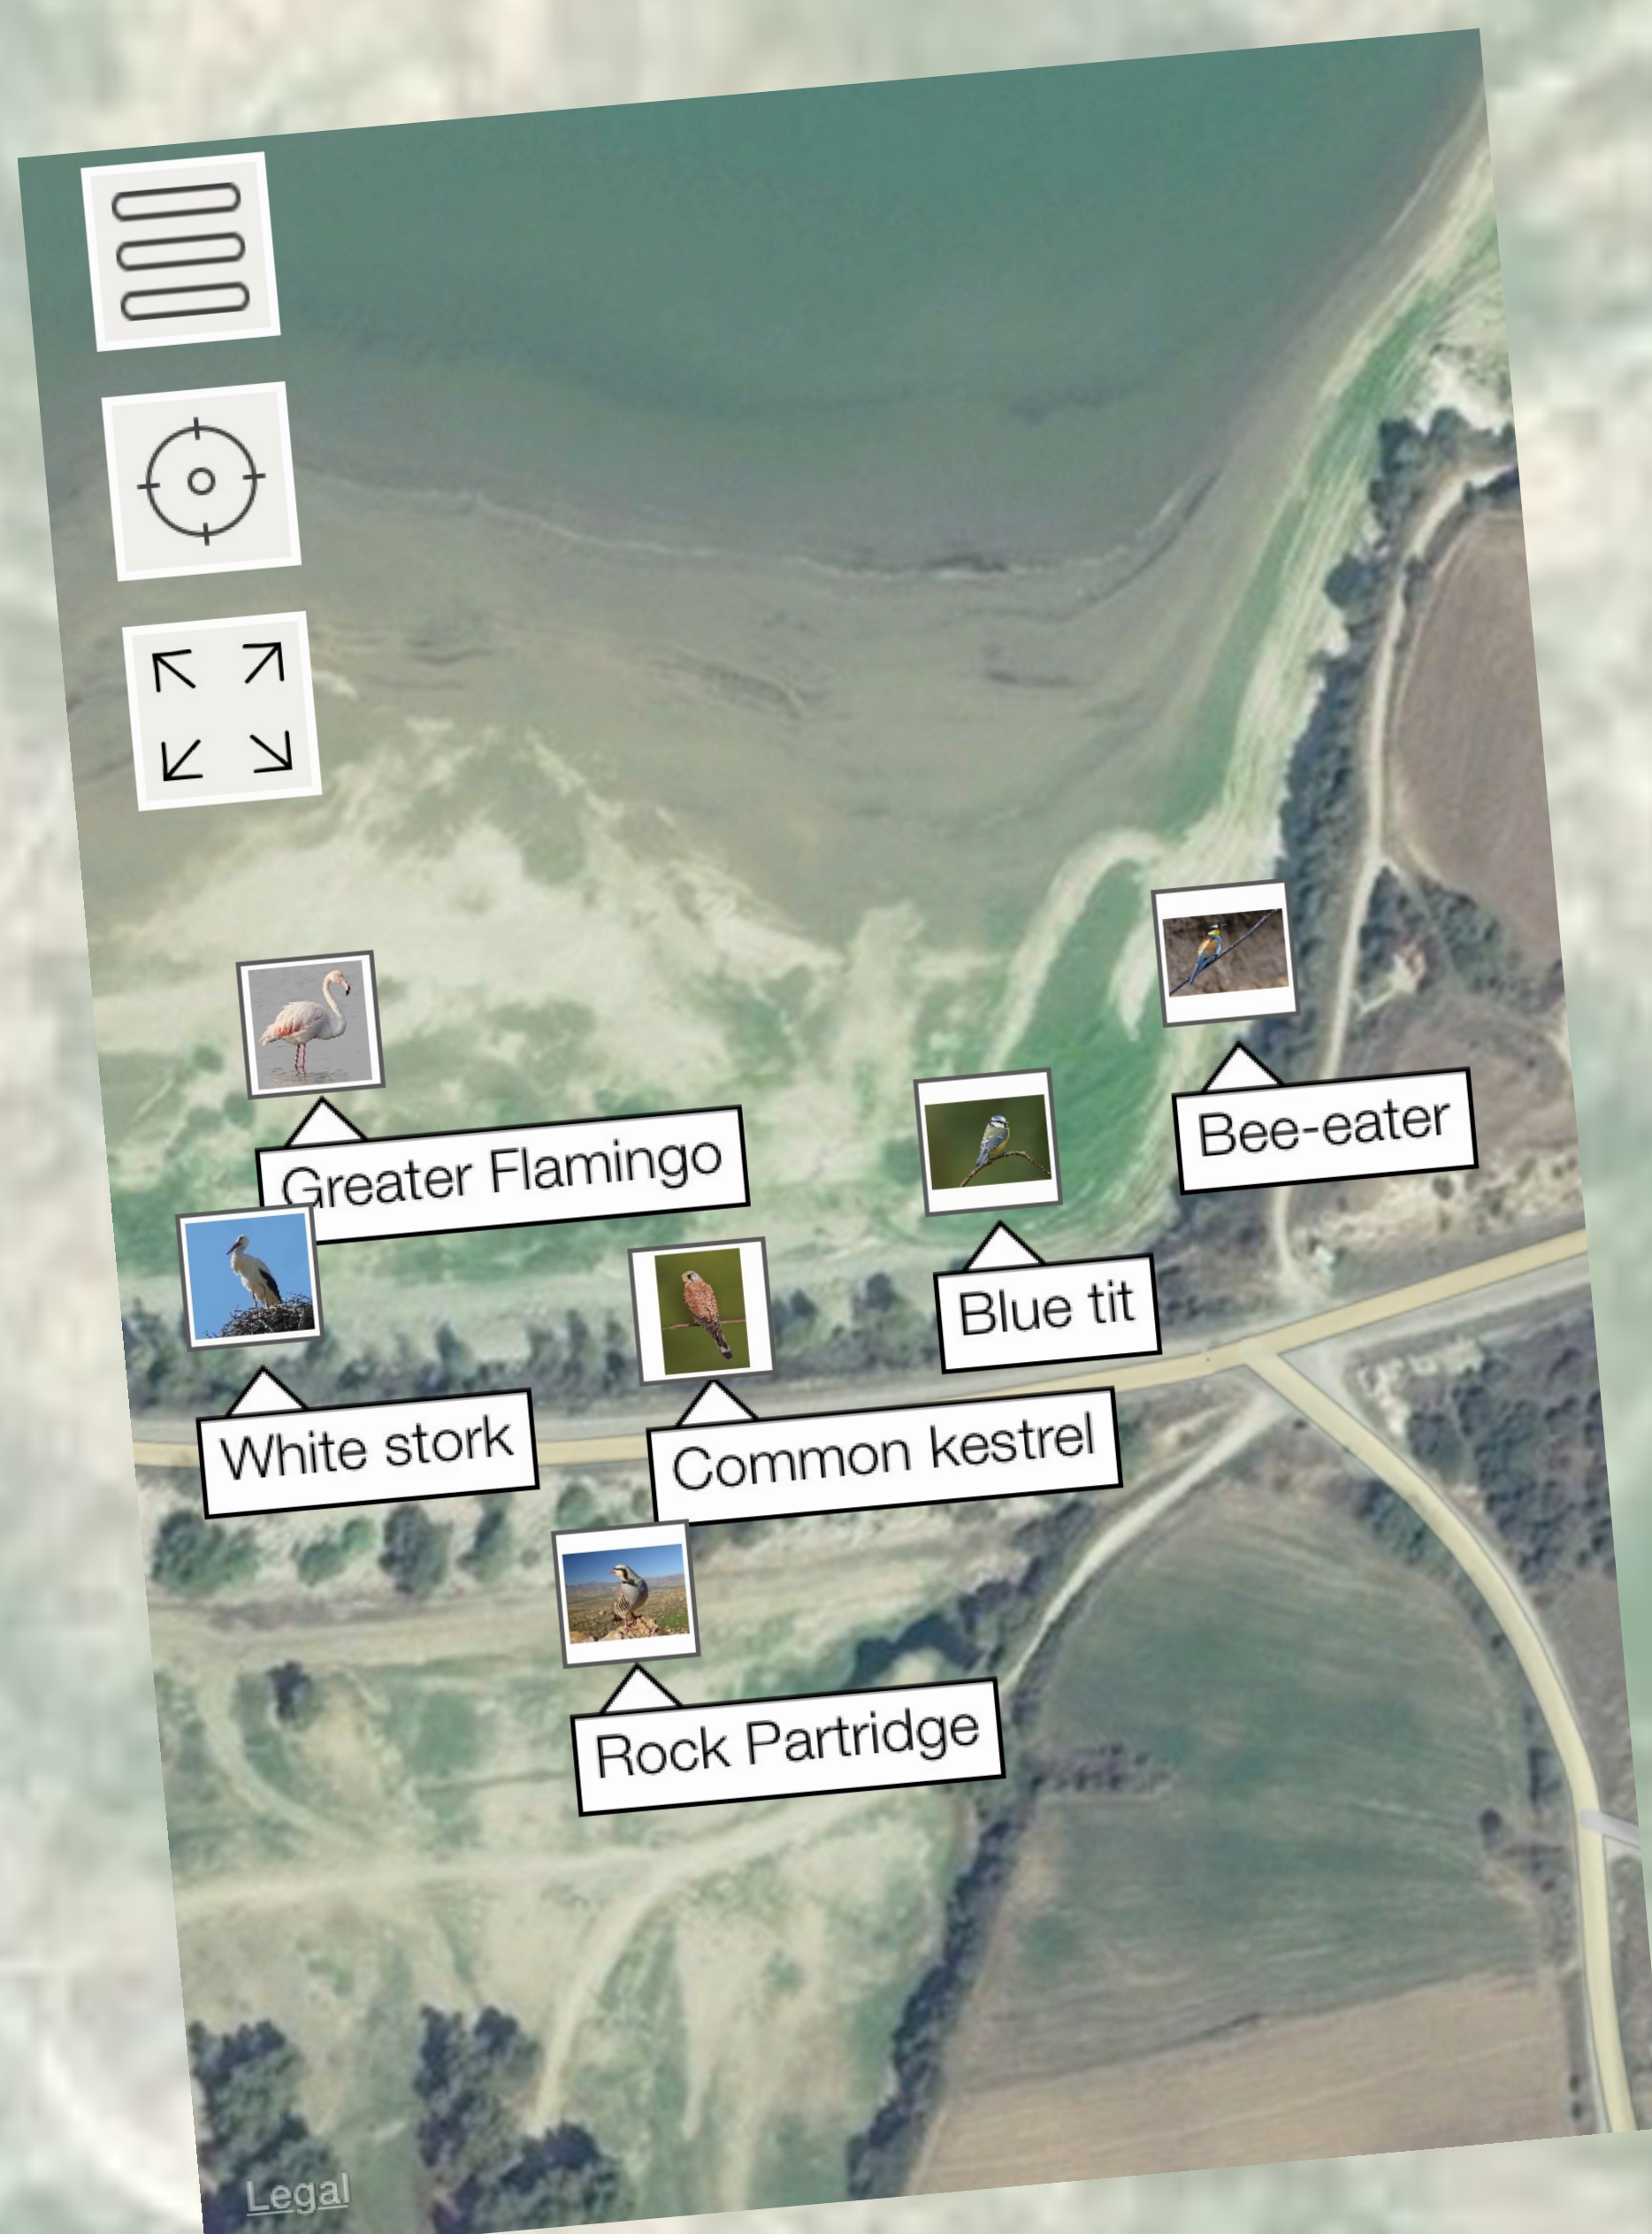

4. Students, Aiani High School – Kozani, Greece

In this game a "project" is assigned to the player. To help in the construction of a Bird Observatory so that everyone can visit the area without disturbing the life of the birds.

The player is guided to discover the birds living in the area. Information is provided in text and video format and the player receives "gifts", necessary for the construction of the Observatory. To be able to use the "gifts", the player has to answer correctly to questions regarding what he has learned.

Then, the player assists in the calculation of the perimeter of the Observatory, helps in its construction, discovers the area problems and helps to resolve them.
